#### **Overview**

- > Revision: Context
  - Knowledge as Context
  - > Information Structure
  - Conversational Implicature
- Austin's Speech Act Theory
- Categorizing Speech Acts
- Indirect Speech Acts
- > Next Lecture: Chapter 9: Meaning Components

# Revision: Context and Inference

# **Context-dependence is everywhere**

- > For example, in a bookstore
  - (1) I am looking for the new Wolfe [book by Wolfe]
- ➤ In a snooker (pool) game
  - (2) I have two reds left
- metonymy: substituting the name of an attribute or feature for the name of the thing itself
  - (3) The ham sandwich is at table three
  - (4) I spent all morning with the suits
- > synecdoche: substituting the name of a part for the name of a thing
  - (5) It's good to see some new faces here

# **Knowledge as Context**

- Knowledge to interpret utterances can come from multiple sources
  - 1. The physical context of the utterance **Deixis**
  - 2. What has already been said **Discourse**
  - 3. Background and common knowledge World knowledge
- ➤ In a dialogue, we often only add new knowledge as a **fragment** 
  - (6) a. Who moved these chairs?
    - b. Sandy (did)

#### **Information Structure**

- Many languages signal whether information is new or given
- > We can signal this in many ways:
  - Determiners in English
  - Intonation (focus)
  - > Topic marking

# **Cooperation in Conversation**

Cooperative Principle: people cooperate in conversation

"Make your conversational contribution such as is required, at the stage at which it occurs, by the accepted purpose or direction of the talk exchange in which you are engaged."

#### > Implicature

The aspect of meaning that a speaker conveys, implies, or suggests without directly expressing.

Can you pass the salt? may implicate "pass me the salt"

#### **Gricean Maxims**

#### **Maxim of Quantity**

- Make your contribution as informative as is required (for the current purposes of the exchange).
- Do not make your contribution more informative than is required.

#### **Maxim of Quality**

- Do not say what you believe to be false.
- Do not say that for which you lack proper evidence.

#### **Maxim of Relation**

> Be relevant.

#### **Maxim of Manner**

- Be perspicuous [= be easily understood]
- > Avoid obscurity of expression.
- Avoid ambiguity
- Be brief (avoid unnecessary prolixity)
- > Be orderly

# **Conversational Implicatures and Hedges**

- Generalised conversational implicatures the inferences we make by assuming cooperation
- Particularised conversational implicatures local inferences for a given situation
- Scalar implicatures (Horn Scales) one item on a scale implicates all weaker items (and no stronger ones)
- Conventional implicatures implicatures attached to lexical items
- Hedges: show we know we are flouting a maxim

#### **Horn Scales**

- ightharpoonup Two words (S and W) form a Horn scale  $\langle S, W \rangle$  if:
  - (i) A(S) must entail A(W) for some arbitrary sentence frame A;
  - (ii) S and W must be equally lexicalized;
  - (iii) S and W must be about the same semantic relations, or from the same semantic field.
- > Words on the scale implicate the negation of words on their left
  - ➤ ⟨ always, often, sometimes ⟩.
  - *>* ⟨..., 5, 4, 3, 2, 1⟩.
  - ➤ \ hot, warm, lukewarm, cold \>.
  - $\rightarrow$   $\langle$  the,  $\{a,some\}$   $\rangle$ .

# Austin's Speech Act Theory

# **Speech as Action**

- Language is often used to do things: speech acts language has both
  - > interactivity
  - > context dependence
- > E.g. If you greet someone or ask them a question, and they don't respond it is very awkward

Austin (1962)

# **Sentence Types**

There are four syntactic types that correlate closely to pragmatic uses

```
\begin{array}{cccc} \text{declarative} & \leftrightarrow & \text{assertion} \\ \text{interrogative} & \leftrightarrow & \text{question} \\ \text{imperative} & \leftrightarrow & \text{order} \\ \text{optative} & \leftrightarrow & \text{wish} \\ \end{array}
```

> But it turns out there is a lot of flexibility:

```
(7) a. Would you like a beer? question b. Is the pope Catholic? assertion
```

A bit like tense and time

# Language as Truth

- One tradition of semantics is based on these assumptions
  - the basic sentence type is declarative
  - language is mainly used to describe the world
  - meaning can be given in terms of truth values
- > What about these?
  - (8) Excuse me!
  - (9) *Hello*.
  - (10) How much can a Koala bear?
  - (11) Six pints of lager and some nachos, thanks!
  - (12) How 'bout them niners?

#### **Perfomative Utterances**

- (13) I promise I won't drive home
- (14) I bet you 5 bucks they get caught
- (15) I declare this lecture over
- (16) I warn you that legal action will ensue
- (17) I name this ship the Nautilus
- Uttering these (in an appropriate context) is acting Utterances themselves can be actions
- ➤ In English, we can signal this explicitly with *hereby*

# **Felicity Conditions**

Performatives (vs Constantives)
Given the correct felicity conditions

- (Austin)
- **A1** There must exist an accepted conventional procedure that includes saying certain words by certain persons in certain circumstances,
- **A2** The circumstances must be appropriate for the invocation
- **B1** All participants must do it both correctly
- **B2** ...and completely
- C1 The intention must be to do this the act
- C2 The participants must conduct themselves so subsequently.
- > If the conditions don't hold, the speech act is infelicitous
  - > Failing A or B is a misfire
  - > Failing C is an abuse

#### **Examples of Infelicities**

- > **A1** *I hereby marry you* (said by someone not authorized to do so)
- > **A2** *I baptize this baby Harold* (baby's name should Herman)
- > A2 I pronounce John Smith dead (uttered by a doctor who has confused John Smith with John Smit, or if John Smith is still alive)
- > **B1** Yes (exchanging vows in a Christian marriage ceremony)
- > **B1** OK (in response to Do you swear to tell the truth, the whole truth and nothing but the truth? wrong formula)
- ➤ **B2** I bet you \$50 the opposition loses the next election (infelicitous without a response: OK you're on; Austin calls the required response uptake)
- > C1 Guilty as charged (if accused known to be innocent by a jury member)
- > C2 I promise to come tomorrow (if there is no intention to keep to the promise)

# **Explicit and Implicit Performatives**

#### > Explicit Performatives

- > Tend to be first person
- ➤ The main verb is a performative: *promise, warn, sentence, bet, pronounce, ...*
- You can use hereby

#### > Implicit Performatives

- (18) You are hereby charged with treason [by me]
- (19) Students are requested to be quiet in the halls [by NTU]
- (20) 10 bucks says they'll be late [I bet you]
- (21) Come up and see me some time! [I invite you]

Can be made explicit by adding an active performative verb

# **Elements of Speech Acts**

Locutionary act the act of saying something

**Illocutionary act** the force of the statement

Perlocutionary act the effects of the statement

Illocutionary force indicating devices(IFID)

- > word order
- > stress
- > intonation contour
- > punctuation

> the mood of the verb

> performative verbs: I (Vp) you that ...

# Searle's speech act classification

**Declarative** changes the world (like performatives)

Representative describes the (speaker's view of the) world

**Expressives** express how the speaker feels

**Directives** get someone else to do something

**Comissives** commit oneself to a future action

# **Felicity Conditions for Requesting**

These things must hold for an utterance to be a **request**:

- $\triangleright$  **Preparatory 1**: *H* is able to perform *A*
- ightharpoonup Preparatory 2: It is not obvious that the H would perform A without being asked
- $\triangleright$  **Propositional:** S predicates a future act A of H
- $\triangleright$  Sincerity: S wants H to do A
- ightharpoonup **Essential:** The utterance e counts as an attempt by S to get H to do A
  - S Speaker A Future Action
  - H Hearer e linguistic expression

# Indirect Speech Acts

# An example

- (22) [Knock on the door]
- (23) Leonard: Wanna get that?
- (24) Sheldon: Not particularly.
- (25) Leonard: Could you get that?
- (26) Sheldon: I suppose I could if I were asked.
  - [Knock on the door]
- (27) Leonard: Would you please get that?
- (28) Sheldon: Well of course!
  - Why do you have to make things so complicated?

# **Indirect speech acts**

>	Sentence Type		Speech Act	Example
	declarative	$\leftrightarrow$	assertion (statement)	I sing.
	interrogative	$\leftrightarrow$	question	Do you sing?
	imperative	$\leftrightarrow$	order (request, command)	sing!
	exclamative	$\leftrightarrow$	exclamation	What a voice!
	optative	$\leftrightarrow$	wish	If only I could sing

- Properties of Indirect Speech Acts:
  - Multiplicity of meanings
  - > Logical priority of meaning
  - > Rationality
  - > Conventionality
  - > Politeness
  - > Purposefulness

#### Literal and non-literal uses

- (29) a. Could you get that?
  - b. Please pass the salt.
- (30) a. I wish you wouldn't do that.
  - b. Please don't do that.
- (31) a. You left the door open.
  - b. Please close the door.
- > People have access to both the literal and non-literal meanings
- Non literal meanings can be slower to understand
- > Some non-literal uses are very conventionalized  $Can/Could\ you\ X? \rightarrow Please\ X$
- > Questioning the felicity conditions produces an indirect version

# **Indirect Requests**

- Preparatory 1: H is able to perform A
- ightharpoonup Preparatory 2: It is not obvious that the H would perform A without being asked
- $\triangleright$  **Propositional:** S predicates a future act A of H
- $\triangleright$  Sincerity: S wants H to do A
- **Essential:** The utterance e counts as an attempt by S to get H to do A
- > Preparatory 1: Can you tell me the time?
- > Preparatory 2: Would you let me know the time?
- > Propositional: Aren't you going to start your annotation?
- > Sincerity: I wish you would answer me

# Why be Indirect?

- Mainly for politeness
  - (32) [Motorist to gas station attendant]
    - a. You don't happen to have any change for the phone do you?
  - (33) [Doctor to Nurse]
    - a. I'll need a 19 gauge needle, IV tubing and some unobtanium
  - (34) [Teacher to student?]
    - a. Would you be so kind as to give me a hand with this?
- $\Rightarrow$  Low Status  $\rightarrow$  High Status is generally more indirect than High  $\rightarrow$  Low

# **Politeness and Face-Threatening Acts**

- Positive Face desire to seem worthy and deserving of approval
- > Negative Face desire to be autonomous, unimpeded by others
- > Threats to another's face
  - > to positive: disapproval, disagreement, interruption
  - > to negative: orders, requests, suggestions
- > Face-saving acts:
  - > don't threaten another's face: I may be wrong but, ...
  - > allow for negative face: Could you please, ...
- Is politeness trans-cultural?
